

*Your specialist for
Nano Coatings*

~ Pure gold on your product

With the environmentally friendly technology „Physical Vapour Deposition (PVD)“ a very thin and pure gold film can be applied on most products.

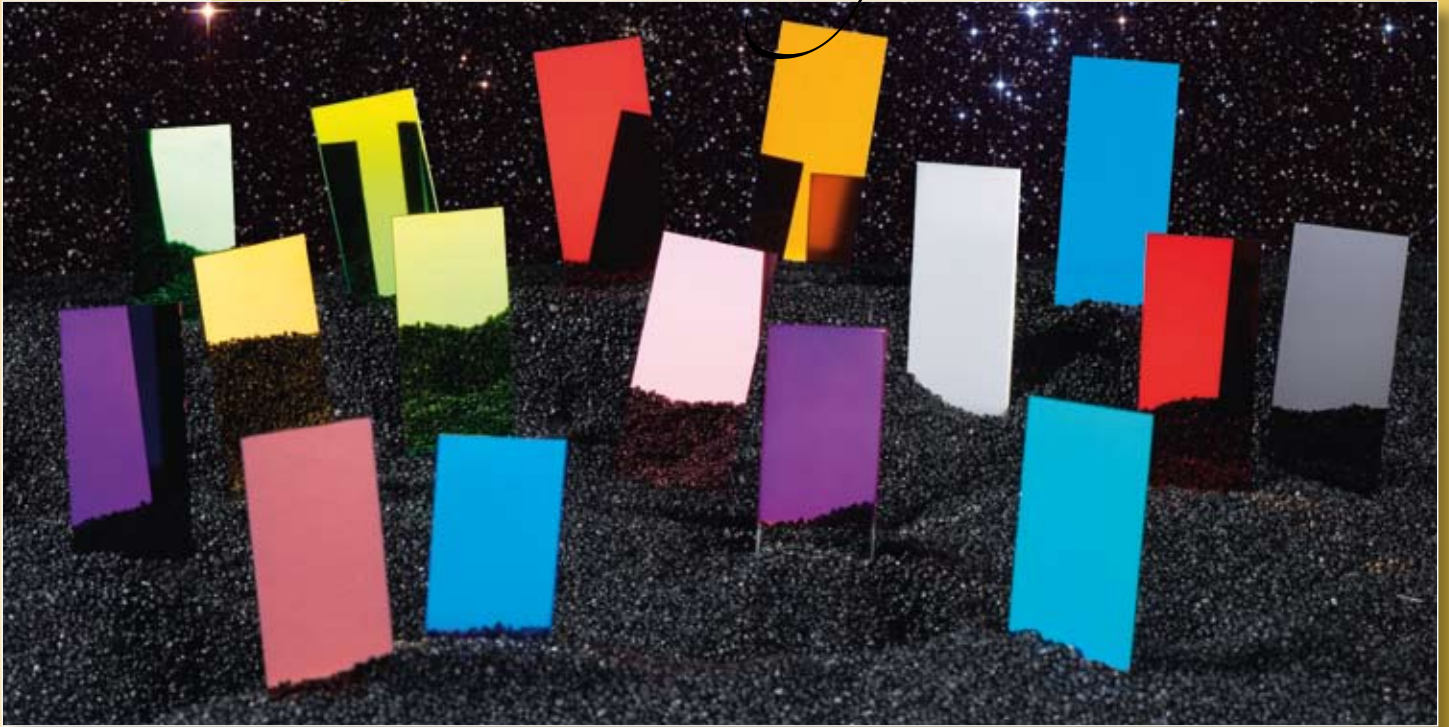

Even very fine surface textures remain unchanged. The adhesion is excellent and the gold surface can show scratch-and wear resistance.

Instead of gold a lot of other metals like silver, brass, stainless steel, aluminium, titanium or chromium for the refinement of surfaces are available.

Functional Nano Colors: "Aradierung"[®] unique

With the environmentally friendly technology "Aradierung[®]" innovative Nano Coatings can be applied on glass, metal, ceramics, plastics, textiles and other materials. These Nano Coatings show highly decorative colors as well as specific functionalities. Every color can be produced and combined with enhanced features like

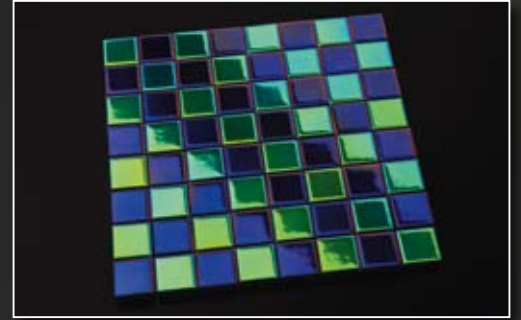

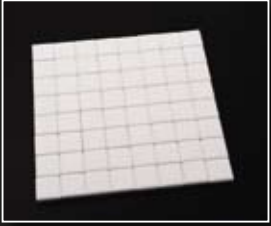

- scratch and corrosion resistance
- sand or water repelling surface
- forgery-proof design (in cooperation with our partner Ara-Authentic[®])
- reduced visibility of fingerprints
